UFI UFU R61709 FOR DETROIT DIESEL DD SERIES ENGINES

UFI Fuel filter element **UFU R61709** is a **Daimler Certified Genuine replacement** for 2012-2025 DD13/DD15 & DD16 Applications.

The filter is made of **FormulaUFI.H2O** filter material, a combination of meltblown and cellulose, which achieves a **filtration capacity of 98% at 10 microns**, according to ISO 19438.

The media is coupled with a hydrophobic inner septum, so that a **water separation capacity of up to 90%**, according to ISO 16332, is guaranteed.

Thanks to the high efficiency and dirt-holding capacity, i.e. it is **able to remove the smallest particles from the diesel fuel**, UFU R61709 contributes to **preserving the integrity of the engine's injectors**.

PLUS

- + Meets or exceeds **OE requirements**
- + Includes **O-Rings** for easy installation
- + **>95% Water Separation Efficiency**
- + **Protects and maintains integrity** of Engine Fuel System
- + Filtering media in **FormulaUFI.H2O**

FORMULA
UFI.H2O
